SOFTWARE ENGINEERING EXPERIENCE

General Assembly – Denver, Colorado   April 2022 – November 2022

Software Engineering Fellow | Full Stack Developer

Successfully completed 500+ hours of expert-led instruction in algorithms, fundamentals, and the industries most in demand technologies. Developed multiple projects and labs including but not limited to::

- Songs to See: Worked with a team of engineers to design and develop a full stack MERN project with a two week deadline. Created an app that allows users to search for upcoming concerts in their area, view performer details, generate a suggested playlist of songs and login to create a personalized profile.
    - Tech Used: Python, Django, PostgreSQL, Docker, SeatGeek/Spotify API, HTML/JS/CSS & Bootstrap
- Artist Portfolio: This is a full MERN stack project. Created a mock portfolio for a graphic artist. The site is designed to be managed b y the artist through a hidden administrative login.
    - Tech Used: React, Express,, Mongoose, MongoDB, Node & Material UI
- Mock Employee Portal: This is a mock employee portal that allows landscaping employees to login, complete and submit timesheets, access pay data, calendar and bulletin board posts, plus weather and emergency resources.
    - Tech Used: Express/Express-EJS, Mongoose, MongoDB, Bcrypt, Sessions, HTML, CSS & Bulma
- Cocktail Hour: This project is a simple web application that allows users to search for cocktail recipes by name or ingredient. Users can also search for information about most commonly enjoyed spirits.
    - Tech Used: HTML, Javascript, CSS, Cocktail DB API & Bootstrap
